About Haqdarshak

Haqdarshak is a social enterprise working to make welfare schemes more accessible to citizens leveraging technology. Our multi-state, multi-lingual, web and mobile technology platform and product line that helps citizens discover, apply for, and benefit from, government and private schemes that they qualify for. They can use the platform through a local trained facilitator, the 'Haqdarshak', or themselves, on payment of a small service fee, which makes it financially sustainable. The 'Haqdarshaks', as they are called, are people from the community and working on an incentive-based model where the income is based on the number of citizens assisted in availing benefits of schemes. Please visit our website www.haqdarshak.com.

We have received a number of accolades in the past including being selected as one of the top 10 finalist of the Innovate for Digital India Challenge run by CIIE on behalf of mygov.in and Intel, top 5 in the Harvard-IIT Delhi Social Challenge, 2016, winner of the NASSCOM social innovation forum NSIF 2016. We were also one of the winners of the Facebook Code for Next Billion challenge. We have continued to receive awards, accolades and grants through 2017 and this year as well.

Our major partners include TATA Trusts, PRADAN, Swades, Crisil Foundation, DHFL Foundation, Ambuja Cements Foundation, Godrej Properties, and J-PAL among others. We are engaged with government departments from the states of Rajasthan, Chattisgarh, Haryana, Maharashtra and Tamil Nadu, and we plan to expand our reach further.

We want to touch a million lives in the next 5 years through effective use of technology and using a network of people on ground. One of the critical parts of our mission is to ensure that our Haqdarshaks and partners are getting the best experience from our platform. Your technical and intellectual skills are vital to meeting our goal of impacting a million lives.

We are looking for a **Full-time DevOps Engineer** based out of our offices in Pune

Who you are?

You will make an ideal candidate if you are passionate about leveraging your technology skills towards building a platform that potentially impacts millions.

- Are eager to work in a social-sector startup, roll up your sleeves and get things done
- Bring a can-do attitude and creative problem-solving skills to deliver strong outcomes in a resource constrained environment
- Have overall 2-4 years' experience deploying and managing DevOps processes and tools in a AWS cloud-driven environment hosting mobile and web applications
- Have experience implementing open source automated build and release tools, implementing test automation tools and writing scripts for automated content deployment
- Experience with tools such as Git, BitBucket, Gradle or Maven, Jenkins, Bamboo,

- Docker/Kubernetes, Selenium, Jira a must
- Understanding of web and mobile solutions using technologies such as PHP, Django, Python, Mysql, Angular, React, Node and open source technologies preferred
- Have flair for technology-driven innovation and able to evaluate new technology for appropriate use cases

Experience in a product company as DevOps Engineer a plus

What you will do?

As a key member of the Engineering team, you will work closely with the Product and Technology leadership to bring your deep technology expertise to help us drive efficiency and agility as we build the next generation of the Haqdarshak platform to meet the growing demands from our partners, customers and end users

- Maintain and manage code repositories across environments, and deploy appropriate processes to maintain strict version control across all CIs
- Leverage your experience to design and improve existing infrastructure and processes
- Support leadership in identifying, evaluating and deploying various open source DevOps tools as needed to establish strong DevOps discipline within the organization
- Undertake proof-of-concepts for new technology adoption
- Support migration to AWS and help write automation scripts for expediting migration
- Be single point of contact for all configuration and release management activities
- Support project managers in planning and status reporting as needed
- Provide guidance to technical teams on DevOps tools and processes

Why you should join us?

We provide opportunities for work that can influence millions and a great exposure to the welfare ecosystem in India as we increase our technology-driven offerings with key ecosystem players. We offer great learning and growth opportunities. We offer competitive salaries benchmarked to other social sector startups and in line with the value you bring to the table
